ABOUT ME

I am a Frontend Software Developer specialized in Web development, mobile development and experienced in problem solving with modern technologies including HTML5, CSS3 and TAILWINDCSS, Figma and Canva for web and app design s, REACTJS, REACT NATIVE , NEXTJS13, LINUX, GIT and GITHUB 🚀

PERSONAL DETAILS

- Nationality : Kenya
- Github : <https://github.com/David-mwas>

EXPERIENCE

15/6/2022

-
23/10/2023

- **Software Engineer Trainee, Graduate and Alumni at alx africa**

Alx-africa

I have recently graduated and completed alx software engineering program which took 8 month basics plus 4 months of specialization in frontend development with React js framework.

I have gained experience to solve real world problems by creating solutions through creating projects including airbnb clone and more available in my github (<https://github.com/David-mwas>), using modern technologies including Python, JavaScript, REACTJS, NEXTJS and TAILWINDCSS. I have also gained experience in Team working and project collaboration through use of GIT and GITHUB that has helped me work with others efficiently in project development.

2nd June,

- **Industrial Training Trainee**

Masinde Murilo University Of Science and Technology

I have industrial training experience by having participated in our university Industrial Training program where we were taken on various practical modules including Helpdesk support and Documentation, Networking, Database administration, Procurement , Software development and Mobile development using Android.

By taking part in this practice i gained industrial experience by collaborating with my peers for doing assigned projects and tasks and taking a role of a team lead.

I got to know how to install, clean and maintain various operating systems including windows 10,11 and linux and installed them practically on both lab PCs and my laptop.

I also gained experience in networking and configuring routers using packet tracer software , managing and creating databases using mysql database.

I gained experience in creating mobile apps in android using Java,Xml,Kotlin using android studio.

EDUCATION

Jun 2021
to current

2020

- **Bachelor Of Science Information Technology**
Masinde Murilo University Of Science And Technology
- Magereza Academy

SKILLS

HTML,CSS, Tailwind CSS, JavaScript

80%

REACTJS, NEXTJS,React Native

60%

PROJECTS

- **TALKGPT-AI**

A chatgpt clone with voice recognition using OpenAI API and voice recognition API to prompt using speech synthesis and typing input.

Technologies used include React, NextJs13, Tailwindcss for styling and deployed in Vercel.

Visit <https://talk-gpt-topaz.vercel.app/>

- **My 3D Portfolio website**

A 3D portfolio made in Three.js and React three fiber that showcases all my skills , progress, projects and my journey as a developer.

Technologies used include React, Three.js, React three fiber, vite, Tailwindcss and deployed on vercel.

Visit <https://david-mwas.vercel.app/>

- **YouTube -clone**

A fully-fledged YouTube clone with streaming features, video play model, channels video play, search functionalities, fully responsive. I have used Rapid YouTube Api with ReactJS , Tailwindcss for styling + Material ui and hosted on vercel

Visit <https://you-tube-clone-david-mwas.vercel.app/>

- **Google-clone-nextjs**

A google clone website using google API to render searches .

Build using REACTJS, NEXTJS13, TAILWINDCSS and deployed on VERCEL.

Visit <https://google-clone-next-js-react.vercel.app/>

- **React-wordscramble_game**

A react word scramble game using React and TAILWINDCSS

Visit <https://react-word-scramble-game.vercel.app/>

- **Disney+ clone**

A fully-fledged Disney+ clone with full google 2factor authentication and streaming features, video play model, Slider animations and fully responsive. I have used Rapid TMDB Api with NextJS13, Next auth for authentication, firebase , Tailwindcss for styling and hosted on vercel
